Notice:

- *. Minus Channel Mode has no effect on the song you record by yourself.
- *.When the power switch turns to ON, this keyboard will automatically select r(right hand MinusMod)

REPEATED PLAYBACK

■ This function lets you repeat a certain part of the song. During playback, press the [REPEAT] button at the beginning of your desired part(A shows in the screen) and press it again at its end(B shows in the screen). Then it can repeatedly play the part you desired until you press the [REPEAT] button again.

Also you can set the part you want to repeat even if the playback is off. Use measure parameter to set point A and then press the [A-B repeat] button. Then set point B, and press [A-B repeat] button again. Press the [Start/stop] button to start the playback of the part you desired.

Press [A-B repeat] button to close this function.

Notice:

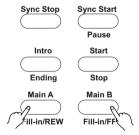

If you set the point Aonly, the repetition will start from A to the end.

For example, you set the point A at measure 2 and point B at measure 8, the repetition will play from measure 2 to 8.

FAST FORWARD/REWIND

■ While playing the demo songs, fast forward and rewind functions can be set according to your needs.

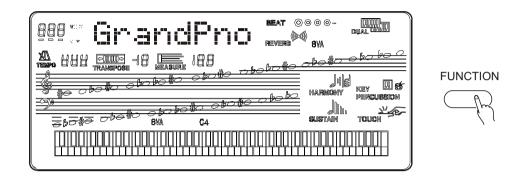

Press [Main A/ Fill in/RW] button to return to the beginning of the demo song Press [Main B/ Fill in/FF] button to speed up the song playing.

WHOLE FUNCTION

Some of the operations in the WHOLE FUNCTION have been introduced before. But some have not. And we are going to introduce the new ones.

What displays in the screen are the abbreviations of the Functions. The following list their full names and their parameter extensions.

Function	Display	extension
Minus Off	Minusoff	R, L, L-r
Harmony	Harmoff	OFF, 1~8
Chorus	Chorsoff	OFF, 1~8
Transpose	Transp	-12~0~12
Tuning	Tuning	-100~100
Dual Volume	D_Volume	00-27
Metronome	Metroff	On-Off

Notice:

All the above functions can use [+/YES] and [-/NO] button to choose function type.

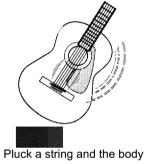

MIDI FUNCTIONS

W8822 and W8821A are MIDI-compatible, featuring MIDI IN and MIDI OUT terminals and providing a variety of MIDI-related controls. By using MIDI functions, you can expand your musical possibilities In this chapter, it mainly talks about what MIDI is, what it can do, and as well as how you apply MIDI to W8822 and W8821A.

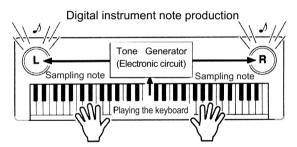

WHATIS MIDI?

No doubt you have heard the terms----acoustic instruments and digital instruments. In the world today, these are the two main categories of musical instruments. Let's consider an acoustic piano and a classical guitar as representative acoustic instruments. They are easy to understand. With the piano, you strike a key, and a hammer inside hits some strings and plays a note. With guitars, you directly pluck a string and the note sounds. But how do digital instruments go about playing a note?

resonates the sound.

Based on playing information from the keyboard. a sampling note stored in the tone generator is played through the speakers.

As shown in the pictures above, in digital instruments, the sample notes (reserved notes) stored in the tone generator section (electronic circuit) can be played when the information on the keyboard is collected. Then what is the information on the keyboard? For instance, if you use this instrument to play a C quarter note, unlike an acoustic instrument that puts out a resonated note, it puts out information from the keyboard such "with what voice", "wth which key", "about how strong", and "when was it pressed" and "when was it released". All the information will be converted to a number value and sent to the tone generator. Based on these data, the music source will adopt stored sample note and play it.

MIDI FUNCTION

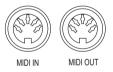

MIDI is the abbreviation of musical instruments digital interface. It allows the digital instruments to communicate with each other, by sending and receiving compatible notes, control change and program change, and as well as other types of MIDI data and information.

MIDI is an international standard. It enables all the instruments to connect together, and allows them to control each other and exchange data. That is, it makes all the instruments a system, and greatly enlarges its function.

W8822 and W8821A can control MIDI device by transmitting note-related data and various types of controller data, and also can be controlled by outside MIDI information, which can automatically decide the music source mode, and choose MIDI track, voice and effect, and change the parameter and as well as perform the appointed voice.

■MIDI Interface

MIDI IN is to receive outside data from other MIDI devices like sequencer in order to control this instrument; MIDI OUT is to send MIDI data (like the note and touch data) from this instrument.

REMOTE PASSAGE

To set the MIDI passage to receive outside keyboard data, please select 01-16. The outside keyboard must set the source passage from which the data is sent and its MIDI OUT connects this keyboard's MIDI IN by the MIDI cable. When set is OFF, this keyboard will receive from all the16 tracks. Pressing [-/NO] and [+/YES] buttons at the same time can retune to the original setting (OFF).

■KEYBOARD OUTPUT

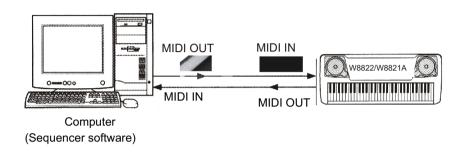

To determine whether the data output from the MIDI OUT.

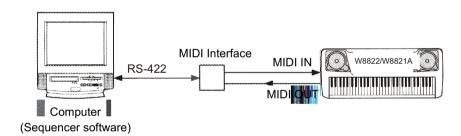

CONNECT TO A PERSONAL COMPUTER

By connecting your W88222/W8821A MIDI terminals to a personal computer, you can have access to a wide variety of music software.

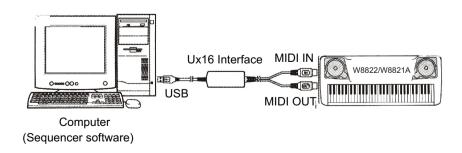

• When using a MIDI interface device installed in the personal computer, connect the MIDI terminals of the personal computer and the instrument.

• When using a MIDI interface with a Macintosh series computer, please connect the RS-422 terminal of the computer(Modem port or printer terminal) to the MIDI interface, as shown in the diagram below.

• When connecting to a computer with a USB interface, just use MIDI interface: first use a standard USB cable to connect Ux16 interface to the computer, and then connect W8822 to UX16 interface correctly.

APPENDIX

VOICE LIST

This instrument has 64-note maximum polyphony. This means that it can play a maximum of up to 64 notes at once, regardless of what functions are used. Auto Accompaniment uses a number of the available notes, so when Auto Accompaniment is used the total number of available notes for playing on the keyboard is correspondingly reduced. The same applies to the Split Voice and Song functions.

Caution: The Voice List includes MIDI program change numbers for each voice. Use these program change numbers when playing this instrument via MIDI from an external device.
